

Java/Python Developer

I am a Junior developer.

I have been studying Java and Python for more than a year. I am well versed in languages and technologies used, I am constantly learning something new.

I love clean and structured code, I always try to write it readable.

I have experience in independent search of information of any complexity. I try to study in detail the tools and technologies I work with. If I don't know something, I'll study it as soon as possible.

Difficulties in solving the tasks do not frighten.

I have a desire for development, I am constantly working on myself.

Not conflicted, I try to find a common language with everyone; tactful.

I am responsible for the tasks set.

While studying at the university, I worked part-time in it.

Engaged in the development of a RESTful application that interacts with the Postgres database.

Work Experience

Freelance – Java/Python Developer

Okt 2021 - current
